240V UREA/DEF IBC DISPENSING KIT

AUP240

Ideal for static transfer of Urea/DEF, this 240V UREA/DEF IBC DISPENSING KIT can be easily mounted in a workshop environment for fast and easy transfer of Urea/DEF.

This unit includes a high quality self-priming vane pump with built in by-pass valve offering superior cool running and a 30 minute duty cycle with flow rates up to 40LPM. The pump kit is supplied with an IBC mounting plate, nozzle holder and manual nozzle ready to start pumping.

For the best control and accuracy, it is recommended to use Macnaught DIGITAL UREA/DEF METER.
