

DOUBLE WALL TANKS

NEW

These tanks are compact and available in several different sizes, providing more flexibility for placement in any workshop.

- Inner tank made of high molecular HDPE, which is blow moulded without seams and is corrosion-resistant
- Outer tank consists of sheet metal that is galvanised on both sides and functions as a collecting tray with the capacity to hold the full volume of the inner tank

- Suitable for lubricating oils, transfer oils, mineral oils, hydraulic oils, fuel oil and diesel
- Low centre of gravity provides a high degree of static stability
- Optical leak probe and level indicator
- Base frame ensures adequate ventilation under the tank

Part No	Capacity	L x W x H	Weight
OTSB400	400L	740 x 700 x 1170mm	46kg
OTSB750	750L	980 x 760 x 1420mm	67kg
OTSB1000	1000L	1280 x 760 x 1420mm	82kg
OTSB1500	1500L	1630 x 760 x 1860mm	133kg

Installer is responsible for ensuring tank application is in accordance to local and state installation and laws and regulations
